

A new online platform for community ideas and action

Why?

We know that residents of St Goran have ideas for the parish and our community, this became very evident through our Neighbourhood Development Plan (NDP). Studies show that a community's sense of belonging is directly connected to its ability to understand and shape its own vision, but it is not always easy for individuals or groups to publicise ideas, gauge opinions or to get action.

What is VocalEyes?

VocalEyes is a digital platform used to help organise, support and inspire communities and get ideas moving.

The VocalEyes platform can create open dialogue, trust and tangible action. To find out more, visit <https://hello.vocaleyes.org>

Selecting **Resource Hub** from the homepage menu you can read **case studies** e.g., Pennard Community Council, a rural community in South Wales.

How can I get involved?

Anyone resident in the parish can register on the St Goran VocalEyes platform using the web address below:

www.vocaleyes.org

You can find our group ("St Goran Parish") by using the search bar at the top of the homepage.

As a registered user you can enter your ideas, rate other ideas, pledge interest or volunteer time.

Unlike other platforms such as Facebook, VocalEyes is anonymous; usernames and contact details are not visible to other users of the platform.

Need help?

We will be providing more details over the coming weeks and months. Please look for updates on the Parish Council website, www.stgoran-pc.gov.uk social media and in the parish magazine, or contact lisa.dunne@stgoran-pc@gov.uk.
